for REGISTRAR

Syllabus for Internal Papers

MHA – Course

First Year

1) Materials and Equipment Management

MHA students are expected to know the following as they finish their course: To describe the operations of the Materials Management Department, and the systems needed to ensure the cost effective procurement maintenance and disposal of hospital equipment. To critically review the systems in place in a hospital for purchase, receipt, safekeeping and maintenance of equipment and consumable items, and make recommendations for improvement.

2) Public Health, Health Education and Ethics

As MHA students are mastering in the field of health-care, they should be aware about public health, health education and ethics involved in it. The objective of this subject would be to understand the aspects of promotion, maintenance, or restoration of health, public health policies and practices; to promote the development of positive health attitudes and practices; to promote a risk – free environment; identify and define moral issues in the context of public health practice, Distinguish between a moral issue or argument and other types of issues or arguments & Articulate moral arguments for or against public health policies & practices.

3) Managing Healthcare across International Borders

MHA students should be given exposure on managing healthcare across International borders. This subject is aimed to enhance the students' knowledge in areas of international healthcare management; to give an orientation on various healthcare models across the World, International political and economic policies that contribute to international healthcare, Medical tourism and its impact & Integrated cross cultural healthcare management.
