

Silver Jubilee Celebrations

Technology Driven Teaching Methodologies- Keeping up with Time and Challenges

Date: 24.02.2012

Time: 3-5 pm

Venue: Senate Hall, The Tamil Nadu Dr. MGR Medical University, Guindy, Chennai.

There is considerable uncertainty about the future of undergraduate medical education in the face of several important challenges. Changes in the health care system have had an enormous impact on the medical school clinical enterprise. Clearly, medical schools are feeling the pressure to adapt to changes in the health care system while maintaining excellence in education.

This is a time for strong academic visionary leadership in medical schools. Keeping up with the changing times and with an eye on the future, a “Training the Trainer” session on “**Simulation in Medical Curriculum**”, titled “**Technology Driven Teaching Methodologies- Keeping up with Time and Challenges**”, was organized by the University on 24.02.2012 at the Senate Hall of this University.

All the faculty of all the Government and Private Medical colleges were invited to attend and participate. About 40 members of faculty attended the session. At the inaugural programme of this training the trainer session, **Dr. Narmadha Kuppusami MD., FACOG** was conferred visiting professorship (international) by the Vice Chancellor.
